

Technical Data Sheet

AF-884

Ingredient Silicone oil and hydrophobic particles of water emulsion

Warranty 6 months (kept in a cool, dry place at room temperature)

Applications AF-884 is used in

- Black liquor for paper and pulping
- Wastewater treatment

Features ● Resistant to strong alkali and high temperature

- Outstanding bubble inhibition ability

Physical indicators

Exterior White or yellowish milky liquid

Solid content (39-41) %

pH value 6.5-9.0

Viscosity, 25°C 2000-8000mPa.s

Instructions ● It can be used directly or diluted to a low content.

-
- Can be diluted directly with water, but need to be used immediately, if the dilution needs to be stored for a certain time, you can consult our company, our company will provide professional dilution method.
 - The recommended addition amount of pulping black liquor is 0.05~0.5kg per ton of pulp, and the addition amount of sewage treatment is generally 10~1000ppm, and the optimal addition amount is determined according to the actual situation on site.
 - The addition point is generally selected where the defoamer is easily dispersed, and can be continuously added with a metering pump.

Precautions

- There are no fatal or harmful ingredients to the human body, but try not to touch it directly or use it if it accidentally gets into the eyes, rinse with clean water
- Storage at room temperature (5-40°C), away from direct sunlight
- Refer to the product' s Material Safety Data

Sheet (MSDS) before use
